

Birdie Bulletin with Steve the Lizard Too! – 4/15/17

From the Desks of Marian and Paula

Our birds were adopted from an animal rescue center. For the birds safety their flight feathers were trimmed for ease with examinations and care. Not all flight feathers have grown back yet on two of our Ring-neck Doves and our Bourke's Parrot so they are mostly cage-bound for safety.

Fernando and Angus are cage mates since adoption day and are bonded as a flock. They come and go from their open cage

Yellow/Brown Border Canary is Fernando

Gray/Pink/Blue Bourke's Parrot is Angus

If you approach one of our four Ring-neck Doves, he may begin to preen or freeze, this is a nervous reaction to danger.

Red wings with green leg band is Shafi (IN CAGE-not flighted)

White wings with spots is Ishaq (FLIGHTED)

Solid beige wings is Khalil (IN CAGE-not flighted)

Red wings with white leg band is Fazil (FLIGHTED)

We are now to capacity with 6 in the desert and 34 in the tropical dome. The new additions to the tropical dome are the Green Singing Finches (pretty singers) and Zebra Finches (with orange/red beaks and zebra-striped tail feathers).

Be sure to stop by Mr. Steve B. (Bearded) Dragon located next to the sitting area in a tank for safety and warmth. He's cool!
